

Formac disk mini
ultra slim storage systems

Formac disk mini

The Formac disk mini range was developed as a solution for storage portability, flexibility and performance. Available in large capacities of up to 320GB the Formac disk mini is an ideal companion for everyone.

A durable, sleek design with both fast FireWire 400 and USB 2.0 ports that also power the drive (so no need for external power supply), the disk mini series also feature an integrated shock absorption suspension system to protect the drive from the affects of day to day portable usage prolonging the life of your drive, with an optional, high-quality Tucano sleeve distinguishing the Formac disk mini as an outstanding versatile product.
